

Creating a blog:

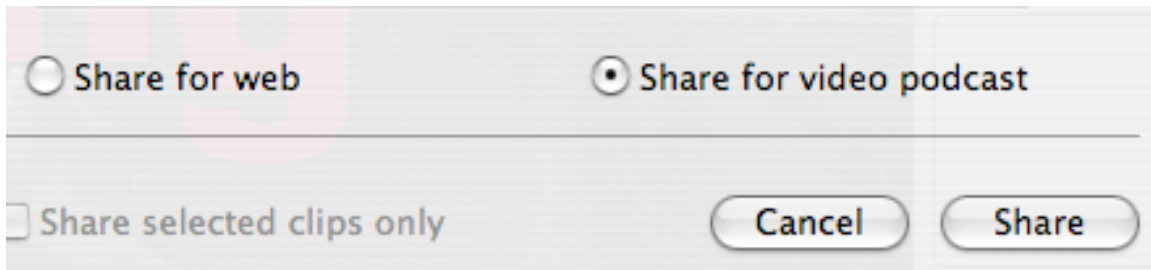

There are many easy ways to create a blog site:

1) go to www.blogger.com

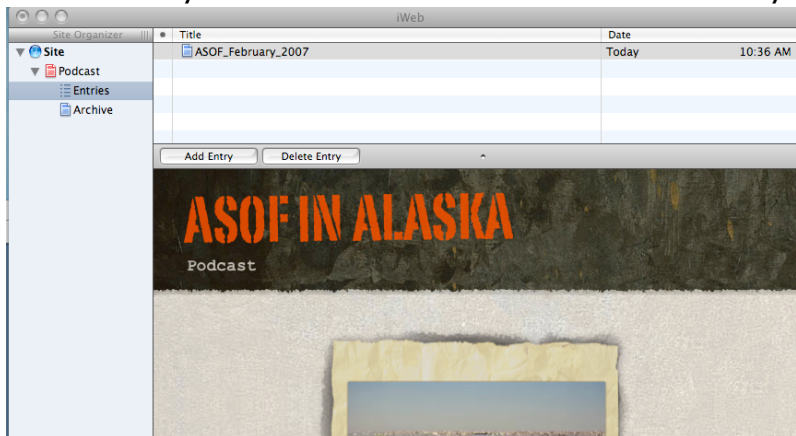

Set up a user name, password, and your first entry. Be sure to copy/paste from MS Word so you have all spelling and grammar correct. If you use this method (works with mac & pc), then you must also load your videos up on another server (see video podcasting).

2) use your mac.com account

When you finish the movie in I-movie, you "share" it as an iweb movie. On the next window. Share for video podcast.

This takes you to the next window automatically:

Hit the bottom at the bottom "publish" then "visit". When you get your url address. E-mail it to: roxykohler@mac.com so we can connect your blog site to the ASOF web page.
